Abstract (Limit: 200 words) This is the five year author and subject index to volumes 38-42 of the Bibliography on Cold Regions Science and Technology which corresponds to 1983-1988 but includes some material before those dates. This Bibliography contains citations from international literature concerned with snow, ice, permafrost, and frozen ground. The Bibliography has been prepared since 1951 and includes citations to patents, journal articles, conference proceedings, monographs, and translations. These volumes are not inclusive to 1988. 50% of the literature is in the Russian language. Additional subject areas include mobility, winter construction, ice navigation, climatology, hydrology, geophysics, and glaciology. The Bibliography is also available through Orbit Search Service, McLean, Virginia for online searching.

BIBLIOGRAPHY ON COLD REGIONS SCIENCE AND TECHNOLOGY

Cumulative Subject Index to Volumes 38-42

INTRODUCTION

This index is a cumulation of the annual subject indexes to five volumes of the *Bibliography on Cold Regions Science and Technology* (38-42).

In anticipation of this cumulation (and the companion Author Index) the annual indexes have been bound separately rather than with the bibliography volumes, so they now may be discarded.

The index is arranged alphabetically by subject. Two kinds of subject terms are included: those contained in an authority list, and free terms used as needed, without vocabulary control. This duality of indexing principle results in a somewhat uneven frequency distribution of terms. Geographic terms are also included, generally by country.

The subject (or geographic) terms are followed by the title of each pertinent article (original, translated, or modified for conciseness or detail), listed by accession number. The title is followed by the principal author's name, the date of publication, the pagination (found useful by some users for value judgments), and the language in which the paper is written (in the case of translations, English is given as the language).

The accession numbers listed after each index entry refer to the *Bibliography* section of the *Bibliography on Cold Regions Science and Technology*. The first two digits represent the volume number; these are followed by a hyphen and the sequence number within the volume.
